

Assignment 1: Introduction

Student Name

OVERVIEW

This exercise accompanies the introductory material in Environmental Data Analytics.

Directions

1. Change “Student Name” on line 3 (above) with your name.
2. Work through the steps, **creating code and output** that fulfill each instruction.
3. Be sure to **answer the questions** in this assignment document.
4. When you have completed the assignment, **Knit** the text and code into a single PDF file.
5. After Knitting, submit the completed exercise (PDF file) to the dropbox in Sakai. Add your last name into the file name (e.g., “Salk_A03_Introduction.Rmd”) prior to submission.

The completed exercise is due on Tuesday, January 14th at 1:00 pm.

1) Discussion Questions

1. What are your previous experiences with data analytics, R, and Git? Include both formal and informal training.

Answer: I have used STATA before for my course in Impact Evaluation. I have no other experience other than that in Data Analytics. I have never used R or Git before.

2. Are there any components of the course about which you feel confident?

Answer: No, I am starting with a blank slate.

3. Are there any components of the course about which you feel apprehensive?

Answer: Since I am familiar with STATA, I am apprehensive about learning how to use other software with similar purposes.

2) GitHub

Provide a link below to your forked course repository in GitHub. Make sure you have pulled all recent changes from the course repository and that you have updated your course README file.

Answer: https://github.com/mse22/Environmental_Data_Analytics_2020.git
